## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 4-15 and 17-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Paoletti (US 4,763,566) or Weber (US 3,918,355) in view of Sartulairi (US 4,890,653) or Giannelli (US 6,253,664). The patents to Paoletti and Weber disclose the claimed subject matter except for the a compressed-gas reservoir for selectively allowing compressed gas to displace the piston. The patents to Sartulairi and Giannelli both teach that it is known in the art to have a compressed-gas reservoir (38 of Sartulairi; 34 of Giannelli) for selectively allowing compressed gas to displace a piston. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided either one of Paoletti or Weber with a compressed-gas reservoir in the manner suggested by either one of Sartulairi or Giannelli for selectively allowing compressed gas to displace the piston, if so desired.

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground of rejection.
